

RegenEAU turns wastewater into a powerful energy source, optimizing domestic hot water with a smarter, more sustainable approach.

Installed alongside the primary system, it reduces energy use and greenhouse gas emissions.

Powered by patented hydrodynamic separation technology, it delivers stable, high-efficiency performance year-round.

Why RegenEAU

Up to **75%** of hot water energy demand covered

Up to **50%** reduction in operating costs

under **10 year** payback period

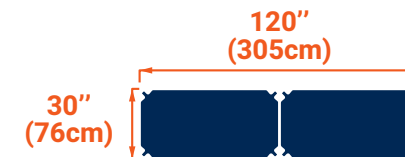

Integration in new construction and retrofit projects

Available models (PreHeat)

PH2

~ **50**
Residential
units

PH3

~ **75**
Residential
units

PH3 installation layout

Required components not included:

- Auxiliary system
- Expansion tank
- Recirculation pump
- Dedicated RP backflow preventer

Smarter. Cleaner. More efficient.
